

Collen R Demo

Technical Program Manager | Project Manager | Senior Business Systems Analyst

Maryland, USA

Phone: +1(202) 658 0216, Email: rcollen789@gmail.com

Professional summary

PMP-certified IT consultant with 12 years of experience leading complex enterprise IT projects involving project planning, software development, AI, system integrations, migrations and cloud deployment. Proven track record in driving digital transformation, business analysis, optimizing business processes, and managing cross-functional teams. Adept at requirements elicitation, and delivering high-impact projects on time and within budget.

Employment history

Technical Program Manager (Consultant)

Sand Cherry Associates – Jan 2024 – Present | Denver, CO, USA (Remote)

- Collaborated with business analysts, solution architects, network engineers, data engineers, and business leaders in system design, ensuring technical solutions met business objectives and were aligned with long-term strategy.
- Developed and controlled project plans, schedules, risks, and test strategies, improving delivery predictability, reducing defects, and ensuring on-time execution.
- Facilitated workshops and requirements-gathering sessions with 20+ cross-functional team members to elicit, clarify, and capture business and technical requirements, ensuring alignment with project objectives and stakeholder expectations.
- Documented comprehensive business requirements, including 15 end-to-end use cases for the Network Inventory Management System, establishing the foundation for MVP scope and functionality adopted by 2,300+ enterprise users.
- Designed AS-IS and TO-BE workflows and process models to map current operations and future state, informing migration strategy from legacy systems and enabling an MVP that validated critical business processes.
- Developed a comprehensive data dictionary of ~150 fields, serving as the authoritative reference for data mapping and preparation during system migration and integration onboarding across 12 related systems.
- Facilitated the user acceptance testing, defining the test cases, scenarios to ensure a smooth adoption, operational readiness and alignment with the business and technical requirements.
- Delivered executive dashboards and technical status reporting, increasing visibility, vendor alignment, and data-driven decision-making using Tableau, SQL, Starburst and Powerpoint respectively.
- Created a Technical PM & BA Playbook, standardizing delivery practices and accelerating onboarding across distributed teams.

Project Manager (Hybrid role: Senior Business Systems Analyst)

Huawei Technologies Jan 2020 - Jan 2024 | USA & Multi-Country Global Resource: (Remote)

- Led cross-functional, technical teams and vendors to deliver \$50M+ programs, consistently meeting scope, schedule, and budget across Agile, Waterfall, and hybrid delivery models.
- Owned end-to-end project planning & solution definition, developing project schedules, business cases, high-level technical designs, BRDs, and FRDs to ensure alignment with business & technical goals.
- Authored and maintained comprehensive technical documentation, including Business Requirements Documents (BRDs), Functional Requirements Documents (FRDs), over 60 use cases, user stories, and technical guides, supporting network monitoring systems managing 500,000+ devices.
- Developed end-to-end process documentation - current state, future state, and gap analyses - to guide system design, integration, and optimization across three telecom operators and 10+ enterprise systems per operator.
- Created and maintained critical project artifacts, including technical user guides, workflow diagrams, configuration documents, network diagrams, and data dictionaries (~150 fields), ensuring transparency, traceability, and alignment with business objectives.
- Delivered data-driven project reporting and insights using SQL, Excel, and Power BI, enabling informed decision-making by technical and executive stakeholders.

Business Analyst

Huawei Technologies – *Dec 2014 - Feb 2020* | **Shenzhen, China**

- Led a team of 10+ engineers, analysts, and project managers in delivering hardware, system, and software projects, generating over \$20M in annual revenue.
- Managed project schedules and priorities through requirements gathering, solution design, and backlog management, ensuring timely delivery and alignment with business needs.
- Facilitated requirements gathering workshops and stakeholder interviews to elicit, clarify, and document technical, functional, and non-functional requirements for a Warehouse Inventory Management system spanning 3 functional domains and 18+ use cases, supporting 1,000+ users and RBAC governance.
- Authored comprehensive BRDs and FRDs, translating business needs into detailed technical specifications and process models to ensure clear communication between business stakeholders and technical teams.
- Conducted end-to-end system analysis and planning, supporting software development, test planning, and execution to improve system performance and operational efficiency for complex enterprise-scale projects.

Internship | Systems Automation Engineer

Tongaat Hulett – **Jun 2011 - Aug 2013** | **Durban, South Africa**

- Applied Agile methodologies to design, develop, and implement automated solutions that streamlined complex workflows, improving team efficiency.
- Gathered technical requirements, documented user stories, and supported sprint deliverables for automated physical and virtual asset provisioning, system validation, and security-focused configuration management.
- Leveraged SQL and Python to automate data collection and analysis for system life-cycle events, reducing manual effort and enhancing visibility into security and compliance metrics.

Education and Certifications

Project Management Professional (PMP) | PMI

AWS Cloud Practitioner | AWS

Master's in Data Science & informatics (Machine Learning) | University of Zimbabwe, Zimbabwe

Master's in Business Administration | National University of Science and Technology, Zimbabwe

Bachelor of Electronic Engineering | National University of Science and Technology, Zimbabwe

Technical Skills & Competencies:

- **Project Management Tools:** MS Project, JIRA, Azure DevOps, Confluence, SharePoint
- **Methodologies:** Agile, Waterfall, Hybrid, Scrum, SAFE
- **Programming & Database:** SQL & Python, Gitlab
- **Data Analytics & Visualization:** Power BI, Tableau, Excel, Smartsheet, Python, Alteryx, Datadog
- **Testing:** Selenium, Postman, API testing, UI/UX Testing, Defect Management, Splunk, Qualys
- **Business Process modelling:** Lucidchart, Visio, Draw.io, BPMN
- **Team leadership:** Cross-functional Team Management, Vendor Coordination
- **Cloud and application virtualization:** AWS, OpenStack, VMWare
- **Others:** SDLC, QA, UAT, Stakeholder & Change Management, Research
